

Science meets Dharma

Research on Batteries

*Dear monks of
Khangtsen!*

We would like to make a survey on how many batteries and which types of batteries are used in Sera.

We then would like to decide whether a battery collection service for Sera can be organized. We feel that batteries contain chemical substances which should not be dumped with common garbage.

We will try to find ways to send used batteries to a recycling company which can reuse the chemicals and properly dispose of the remaining materials.

So please put your used batteries into this box and bring the box to Science meets Dharma Sera Lachi classroom
until December 12th, 2006

Your battery team of environment project SmD.
